

COMMITTEE ON THE MEDICAL EFFECTS OF AIR POLLUTANTS

USE OF SUBSTITUTE FUELS IN CEMENT KILNS

Background

The HPA is in the process of producing an interim position statement on the public health consequences of the use of substitute fuels in cement kilns and have approached the Committee for advice prior to finalising its position.

There are 5 annexes to this paper:

- Annex 1: Substitute Fuels in Cement Kilns
- Annex 2: ERM report – Air Quality Assessment (IPPC): *Westbury Works* – 2001
- Annex 3: EA Study of Ambient Air Quality at Bratton, Wiltshire -2001-2002
- Annex 4: EA Monitoring data from Ketton I
- Annex 5: EA Monitoring data from Ketton II

Questions put to the Committee are listed on page 12 of the report (paragraphs 35 – 37).
